

Troubleshooting

SYMPTOM	SOLUTION
Engine drives slowly	<p>Battery power in the engine may be weak. Replace all three batteries in the engine with fresh, alkaline batteries.</p> <p>The wheels on the engine or attached cars may be dirty. Wipe them with a clean cloth.</p>
Engine does not respond to the remote controller	<p>Battery power in the remote controller may be weak. Replace all three batteries in the remote controller with fresh, alkaline batteries.</p> <p>You may be beyond the maximum range of the remote controller which is about 12 feet.</p> <p>You may not have a clear path between the remote controller and the engine. This toy works best when there are no obstructions between the engine and the remote controller.</p> <p>Bright sunlight or fluorescent lights may affect the range of the remote controller. Try dimming the room you are playing in.</p> <p>The engine may have shut off. If you do not operate the remote controller for a few minutes, the engine shuts off automatically and the ready light turns off. Press the power button on the engine, and operate the remote controller to restart.</p>

FCC Note (United States Only)

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Consult the dealer or an experienced radio/TV technician for help.

Note: Changes or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

 **ICES-003**  **NMB-003**

 This Class B digital apparatus complies with Canadian ICES-003
 Cet appareil numérique de la classe B est conforme à norme NMB-003 du Canada

Rapid Rescue Fire Squad™

Battery Information

1.5V x 6
"AAA" (LR03)

SHOWN ACTUAL SIZE

We recommend the use of alkaline batteries for longer battery life.

Battery Installation

Engine

- Locate the battery compartment on the back of the engine
- Loosen the screws in the battery compartment door with a Phillips screwdriver. Lift the battery compartment door and insert three "AAA" (LR03) alkaline batteries.
- Close the battery compartment door and tighten the screws with a Phillips screwdriver. Do not over-tighten.

IMPORTANT! Under normal use conditions, the batteries in the engine will require replacement more often than the batteries in the remote controller. For additional information, see the troubleshooting section.

Remote Controller

- Locate the battery compartment on the side of the remote controller.
- Loosen the screw in the battery compartment door with a Phillips screwdriver. Remove the battery compartment door and insert three "AAA" (LR03) alkaline batteries.
- Replace the battery compartment door and tighten the screw with a Phillips screwdriver. Do not over-tighten.

Battery Safety Information

Batteries may leak fluids that can cause a chemical burn injury or ruin your toy. To avoid battery leakage:

- Do not mix old and new batteries or batteries of different types: alkaline, standard (carbon-zinc) or rechargeable (nickel-cadmium).
- Insert batteries as indicated inside the battery compartment.
- Remove batteries during long periods of non-use. Always remove exhausted batteries from the toy. Dispose of batteries safely. Do not dispose of batteries in a fire. The batteries may explode or leak.
- Never short-circuit the battery terminals.
- Use only batteries of the same or equivalent type, as recommended.
- Do not charge non-rechargeable batteries.
- Remove rechargeable batteries from the toy before charging.
- If removable, rechargeable batteries are used, they are only to be charged under adult supervision.

Your child is bound for a world of adventure!

All Aboard!

- Hook the cars together and place them on the track. Make sure the engine is in front.

Hint: We do not recommend using the engine on carpets. For best performance, use on the track provided or hard, flat surfaces.

3-Position Remote Controller

- Press the power button on top of the engine. The ready light turns on.
- Hold the remote controller with the stick facing you. Point the remote controller toward the engine and push the stick forward. The engine moves forward around the track.
- To stop the engine, pull the stick backwards to the stop position.

Hints:

- If you do not operate the remote controller for a few minutes, the engine shuts off and the ready light turns off. Press the engine power button, and operate the remote controller to restart.
- This toy works best if you have a clear path between the remote controller and the engine. Point the remote controller at the engine. The maximum range of the remote controller is about 12 feet.

WARNING

To prevent entanglement, keep hair away from wheels.

The more you collect, the more fun it gets!

Use multiple remote control vehicles at once!

Multiple track packs used to create this configuration. Each sold separately & subject to availability.
